

1 My Business Goals

WAY MORE developed by **Abdul Wasay**. Its a modern e-commerce brand specifically for the men's my platform specializing in:

- **T-shirt for teenagers**
- **Cloths for men**
- **High quality**
- **Affordable price**

My primary goal is to provide user-friendly interface and best experience to the customer

- **Make a responsive website for both mobile and desktop**
- **Real time product update**
- **Cart managing system**

Technical planning for **Way More** marketplace

Frontend (Next.js)

Responsive and user-friendly interface

Total numbers of pages 4

- **Home** display all product
- **Product detail**
- **Cart** manage all selected product before buy
- **Order Confirmation**

Backend (Sanity CMS)

- Use as a database and add all product in proper way
- Use for managing product data and customer data and order information

2 Key workflows :

Browsing product:

When user visit the **WAY MORE** e-commerce website. The frontend fetch the Product data API from the Sanity CMS

Adding Product to Cart :

When user select the product and add it to the Cart . The cart data is manage via the sanity CMS using update method

Placing Order :

User conformed order and make payment through the third party API and then the order detail are store in the sanity CMS using shipment tracting API

3 API End Points :

Product data API :

EndPoint : /Product

Method : GET

Description : Product data fetch from the Sanity CMS

Response : id, product title, ,price ,stoke and Image

Order API :

EndPoint : /order

Method : POST

Description : Create a new order

Response : Payment detail and customer info

Shipment API :

EndPoint : /shipment

Method : GET

Description : Track order via third party API

Response : Shipment id , order id and Status
